

WORK SAFELY IN WINTER CONDITIONS

The winter season brings new hazards to watch out for on the work site!

- Keep walkways, entrances and emergency exits free from ice and snow
- Make sure parking lots are plowed and well lit
- The beginning of winter is a great time to check that your carbon monoxide detectors are in good working order

If the weather forecast is particularly severe, employers may consider allowing employees to leave early or work from home.

Always use proper form when shoveling snow, as well as the proper tools for the job!
